

Fast, complete bacteria killing power

JET-CHLOR Tablets not only kill bacteria, they also inhibit bacteria re-growth.

Formulated from calcium hypochlorite, JET-CHLOR® Tablets are only 2-5/8" in diameter and only 13/16" thick. They dissolve slowly, evenly and completely.

Each easy-to-handle tablet contains at least 70% available chlorine. They are less hazardous to use than any other forms of chlorine, such as liquid or powders, because you are never exposed to any dangerous gases. JET-CHLOR Tablets are registered with U.S.E.P.A., Registration No. 45983-1.

JET developed JET-CHLOR Tablets especially for the feeders used in our JET-CHLOR Disinfectant Systems. They can be used in other tablet feeders as well.

Now add up all the JET-CHLOR Tablet benefits

1. Fast and complete bacteria killing power
2. Convenient and easy-to-handle
3. Less hazardous to use than any other form of chlorine
4. No dangerous gases, liquids or powders
5. Less chemical required
6. Economical to use because they dissolve slowly, evenly and completely
7. High available chlorine – 70% per tablet
8. Can be used in JET-CHLOR Tablet Feeders and in other tablet feeders too
9. Controlled release of chlorine every time
10. Positive disinfection is assured
